Client Testimonial

January 24, 2008

Dear Andrew,

We did a search on the internet to find someone who could build the conservatory we were dreaming about. We were looking to replace the existing wooden conservatory, which was built by the previous owner, with the room you would eventually design. Blue Diamond Conservatories had a very informative web page to start our research. After initial research online, we set up an interview with you. From day one we were impressed with the information and knowledge that was presented about Blue Diamond Conservatories.

Our old design was an octagon; we were looking for more usable space. With your suggestions of squaring corners and adding some additional square footage, we came up with the room of our dreams. All aspects from ordering to delivery, set-up and take-over of our room were done with professionalism and accuracy. We have used the room for three months now, during the coldest months of the year, and the payoff of the high efficiency glass is very evident. We appreciate all that Blue Diamond has done for our family and we will continue to Star gaze in the evenings and watch the Snow during the days.

Sincerely,

Mr. & Mrs. D. - Pennsylvania
